- 1 RJ45 Console port.
- 1 RJ45 Management port

Applications

The AMVG-1464 is a high-performance, multi-purpose PON MDU voice access gateways, designed for small and medium-sized enterprises. The AMVG-1464 is designed to meet the needs of operators or virtual operators and enterprise units. The AMVG-1464 provides users with rich set of voice and fax services, This product is to be used with GPON/EPON OLT equipment to support voice services that require quality network connectivity.

The AMVG-1464 includes a variety of interface types to support the connection of analog phones and fax machines. The product adopts the standard SIP protocol and complies with the TISPAN/IMS standard. It is perfectly compatible with IP PBX, SIP server and carrier IMS/NGN Soft-switch platform, providing flexible and diverse access modes for large-scale deployment of carrier projects and enterprise converged communications.

Device Management

The AMVG-1464 is easily managed via WebUI, which provides configuration of the different voice and fax services, event & fault management, performance monitoring and Syslog. Basic remote management via OMCI for firmware upgrade and Ethernet OAM is also supported.
